

Husco International and the Environment

Environmental Policy

The Husco International Environmental policy applies to all Husco facilities. Our goal is to go beyond regulatory compliance to reduce Husco's current and future environmental impact.

Husco Environmental Policy Statement

Husco is committed to conducting operations in a manner that is protective and respectful to our environment. The Husco International Environmental Management System (EMS) is a process by which we will meet this commitment.

The Husco EMS is founded upon fundamental topics for which the management team strives to uphold:

1. Husco will comply with all relevant environmental regulations, legal and other requirements to which the organization subscribes.
2. Husco is committed to the prevention of pollution, the conservation of energy and natural resources, as well as tracking and reducing greenhouse gas emissions.
3. Husco is committed to responsible chemical management practices including elimination of the use of hazardous chemicals whenever possible.
4. Husco is committed to recycling waste materials whenever possible as well as partnering with companies providing beneficial reuse of our wastes.
5. Husco is committed to utilizing business practices that minimize impacts on biodiversity, land use, deforestation, noise emissions, animal welfare, as well as to partnering with suppliers who also share these same values.
6. Husco is committed to continual improvement by establishing and reviewing objectives and targets within the EMS.
