

# SOLENOIDS

## Start/Stop, One-Way Clutch, LFS

Husco manufactures a range of custom-designed solenoids for a variety of internal combustion engine and electrified driveline applications. Contact the Husco engineering team to learn more about each application and how it can be customized to fit the needs of your system.

### **Start/Stop and Park Inhibit Solenoids**

- Electro-magnetic detent
- Energized holding force up to 82 N
- Internal mount with multiple variations

### **One-Way Clutch Solenoid**

- Integrated PCB for high side switch
- >10 N net force over 3.5 mm stroke
- Spring retract
- Internal mount

### **Linear Force Solenoids**

- Efficiency through simplicity
- Fast response time
- Low hysteresis
- Reliability in harsh engine conditions

Husco's Automotive team specializes in collaborative development of customized performance solutions. Contact the engineering team for your custom solution.
